ABOUT ME

I am a B.Tech student in Computer Science and Business Systems (CSBS) with a strong passion for building innovative, real-world solutions that bridge technology and business. As a HackIndia participant, I focus on combining technical skills with strategic thinking to create impactful digital products.

With experience in Python, Java, web development, and data analytics, I enjoy working in collaborative environments that challenge me to grow. I'm passionate about solving complex problems, exploring AI and automation, and driving value through technology-driven solutions.
